College-Ready

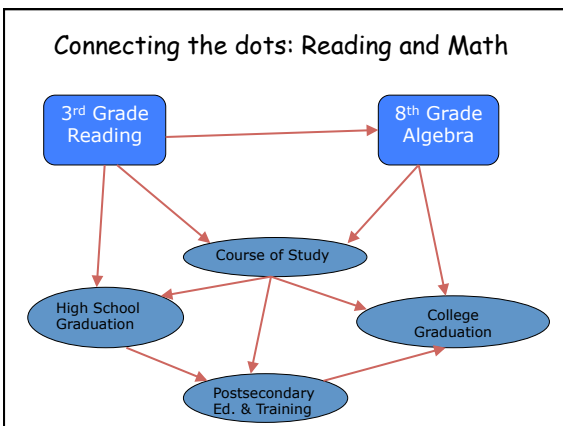

“An eighteen-year-old who is not college-ready today has effectively been sentenced to a **lifetime of marginal employment** and **second-class citizenship.**”

Wagner and Keegan, 2006

Career-Ready (CTE)

“Demands on students’ literacy skills are becoming increasingly intense and rigorous, especially in highly technical CTE courses and in today’s labor market. Students must possess the requisite literacy skills for career and academic success, yet barely one-third of high school graduates are considered proficient in reading.”

Literacy: Connecting the dots

“The National Research Council asserts that academic success, as defined by high school graduation, can be predicted with reasonable accuracy by knowing someone’s reading skill at the end of third grade. A person who is not at least a modestly skilled reader by that time is unlikely to graduate from high school.

7 Keys to College Readiness

1. **Reading** in Grades K-3
2. Advanced **Reading** on state assessments in Grades 3-8
